Why should any body of Americans thank the President for receiving their visit in the nature of respectful recognition of the high office temporarily held by him? It was his duty, official cares permitting, to receive them. A President raised to the pinnacle of honor by the people is, or should be, always glad to welcome American citizens to the Executive Mansion of the nation.

Let it ever be borne in mind that in the United States the people are the sovereigns, officials their servants. A society bearing the suggestive title of Patriotic Order Sons of America will do well to set a good example in refusing to exalt the servant above

EXPENSIVE MEDDLING.

The Supreme Court of Massachusetts has decided that one Thompson shall pay \$30,000 for meddling with the family affairs of Mr. and Mrs. Brake. The defendant, becoming possessed of some information of alleged misconduct of Mrs. BEALE before her marriage, took it upon himself to write a letter to Mr. Braze, relating the scandal, and polsoned the husband's mind against his wife. A separation followed. The abused woman, who was the hapless victim of Thompson's vicious and malicious meddling, sued her traducer, and a jury vindicated her and awarded her \$30,000 damages, which THOMPSON must now pay.

Every right minded person will applaud the verdict. What is more contemptible than the breaking up of a bome, the estranging of hearts, and the precipitation of the woes that follow the fiendish work of the monger?

The Court truly remarked in its opinion:-The defendant owed no duty to the husband

marriage, and there is no evidence that he was acting in the discharge of any duty, moral,

IS THIS TRUE?

The story told by Mrs. NELLY DENTON of the manner in which her complaint against young WILLIAM F. HAVEMEYER for insulting her was dismissed at the Yorkville Police Court, if true, is one which seriously reflects record in the case shows that HAVEMEYER WAS discharged because of the non-appearance of Mrs. NELLY DENTON, the complainant. That she was in the building, awaiting an opportunity to appear, is also a certainty.

Now, was she detained downstairs by a conspiracy among the attaches of the Court until the case was called in order that HAVEMEYER might escape? The defendant is wealthy; the complainant is poor. Does this signify anything?

It is not enough that Judge McManon has ordered a rehearing in the case. He should probe this matter thoroughly and ascertain if any one connected with his Court abetted this attempted miscarriage of justice. It is very serious matter.

There is a breezy little smirk upon the everexpressive and ultra-mobile features of the patriotic Mongolian population of Mott street. It is not often that these intellectual, pleasure-loving citizens have an opportunity to indulge in a little wholesome theatre-going. They have a soul above the "Brass Mon keys" and "Rag Babies" and "Tin Soldiers" of metropolitan favor, and don't care a snap for the ridiculous records of current events, called plays, produced at the Madison Square or at Palmer's Theatre, To the Mongolian nothing is interesting, from a dramatic point of view, that doesn't take place B. C., and Americans selfishly gratitying their own desires for A. D. occurrences have entirely over ooked this fact.

As before remarked, however, there is breezy little smirk dominating over Mott street this morning. It lingers frivolously round the laundries; it comes very near to baloing the eating-houses, while at the Joss Temple at 10 Chatham square its dimensious assume such ample proportions that only a seuse of decency restrains this pen from calling it a grin, undilused and obtru-

A real Chinese cot: piny has come to town, with fifty real dramatic Chinamen in it, and two Mongolian stars, M. Iaka Wing and Sig. Moo Sung Jea.

Only a few weeks ago South Fifth avenue quaffed its absinthe in an agony of glee at the advent of Coquelin, and Avenue B ate its succulent sauesages in a frenzy of enthusiasm at the arrival of Herr Junkermann. Who shall deny to the honest, collar-loving Chinese the right to eat their rats in fervent welcome of the celebrated Taka Wing?

A representative of Tare Evening Wonld who has had some faint experience in interviewing repaired to the Joss House this morning trusting to find there Taka Wing. All the Mongo cans had secured shelter at the Joss House with the exception of the two stars, who had been carried off to the houses of hospitable triends. It is not generally known that the Chinese are excessively hospitable, and where Europeans merely request, "Come and break bread with me," the Chinese remark, "Come and eat rats with me," which is, of course, a more luxurious and tempting form of invitation.

The Joss House this morning was extremely interesting to look at. It was littered with one hundred trunks containing all the dramatic "props." of this famous company that produces twenty-four dramas in two weeks, or an average of two dramas for every work-

Even in their unceremonious delivery it was easy to see a remarkable histrionic talent in the features of these Celestials. The author of "Hi Lon Tan Moo" is Koong Ming, who, it is perhaps unnecessary to say, is a lineal descendant of the potent and all permeating Confucious.

"What do you think of America?" asked
the interviewer, trying to regard Ta Ka Wing
as a brother of Irving or Barrett, or Bernhardt or Couclin, and therefore considering
his views upon America as highly important.

Ta Ka Wing shrugged his shoulders in a
very chic way and spoke for about fifteen
minutes. What he said was apparently absorbingly interesting, for everybody listened.
It was all lost upon the questioner, however.
The kindly interpreter came to his assistance.

The kindly interpreter came to his assistance.

"Taka Wing says," he explained, "that he loves America and the Americans, and is so glad to be here. He is delighted with Mott street which he considers one of the most superbly constructed thoroughfares he has ever seen. Nothing like it exists for him in Chins. He is surprised at the luxury to be found in the Mott street houses, at their wonderful cleanliness and at the bewildering array of modern improvements that he finds. He has seen as yet very little but Mott street. He is much impressed with the glimpse he had of Elizabeth, Mulberry and Baxter streets. Haxter street particularly delighted him with its display of quaint American clothes. He is de-

Ta Ka Wing, though he didn't understand a word, smiled most beatifically and extended his hands.

"May I ask you to synopsize for me the performance in which you open Monday night?" he was asked.

Ta Ka Wing, through his interpreter, replied as follows: "It all takes place ten years before the Christian year. The first act shows a conference of the genii, who resolve to help the Chinese in their wars with the Northern Tartars. Gen. Yung Zoon Pow marries the Princess Koon Joo, and then leaves at the head of his army. In the next act the gallant Yung Zoon Pow is captured and marries the daughter of the Tartar who caught him. He becomes the father of a son by her, and five years later returns to China. A war has broken out there, all his family have been killed, with the exception of the Princess whom he married, and who awaits him with burning impatience. She has been saved from massacre by Zoon Gaeng, a slave, but is just about to kill herself, when her husband arrives. There is much pathos in the meeting that follows, and upon the affecting tableau the curtain fails. In the third act young Zoon Pow triumphs over the Tartars and restors Ton Tai Zoon to the Chinese throne. He then proceeds to live happily with his two fond wives. There is a great deal of comedy in 'He Lon Ton Mow,' but it is impossible to describe it in a few words."

Ta Ka Wing then begged to be excused as he had to go over to the Windsor Theatre and inspect the stage. Before leaving he said he was intensely pleased to see that the Mott street Chinamen were still consummately patriotic.

As the weather grows warm, the sale of James Pyle's Pearline Washing Compound rapidly increases. This proves that many women recognize the fact that Pearline makes washing and cleaning very much easier than when done with the ordinary means. Proves also that summer clothing being of delicate texture and color, will not stand the rough usage necessary when washed with soap, and establishes the fact that PEARLINE, in doing away with the rubbing, lessens the wear and tear and fills a very important place. Delightful for bathing in fresh or salt water. Its ingre-

for a three years' lease for stallion service, and for whom \$45,000 was offered outright, was among the lot, which included three stallions and nine brood-mares.

They started on their Western trip on August 12, last year, and on the following day occurred the accident at Shohola Glen,

It was not until December that Mr. Aby recovered aufficiently from the accident at Shohola to resume his work of selecting stock. Then he came East again and was commissioned to buy the best stallion that money could purchase, and to bring out the other mares owned by Mr. Gebhard.

The horse selected was Greenback, an imported stallion, by Dollar, out of Music, by Stockwell, who is considered to be the very best horse ever imported into America, many Englishmen claiming that they never saw his equal.

Greenback was fooled in 1875. He is deep seal brown in color, stands almost six-teen hands high, has good legs, plenty of muscle, wide hips and long body, and gives evidence of possessing creat strength and staying powers. His movements are graceful and undulating, and he is the ideal picture of the thoroughbred race horse.

and undulating, and he is the ideal picture of the thoroughbred race horse.

His pedigree shows a close relationship with the best racing blood of the English turi, the Flying Dutchman, Bay Middleton, Barbelle, The Beron, Pocahontas, Annandale, Extravagance, Royal Arch, Sultan, Rowten, Glencoe, Touchstone and Voltaire boing found in his line.

His sire, Dollar, was a French horse whose merit as a sire is famous. He got Salvajor, the winner of the French Derby of 1875; St. Cyr. Peria, Almonza, Nettian, Fontainebleau, Salvanos, winner of the Cesarewitch in 1872; Torrent and Androcles,

His dam, the Duke of Hamilton's great mare Music, foaled Ossian, winner of the St. Leger., Fiddler, Song, Songtress, Nina, and Poetry, all famous in the annals of the English turi. He is the only direct representative of Bay Middleton's male line in this country.

Mr. Aby took Greenback and a carload of brood mares out to California early in the Soring, and they now form the nucleus of the of the stud of the Guenco farm. During the present season over thirty of the finest thoroughbred mares of California have been bred to Greenback and St. Saylor, who is too well known to turfmen of this

country to make any account of his famous career necessary.

After the harvesting is over Mr. Aby will come Fast again and make some purchases of brood mares to enlarge the breeding facilities of the farm, as Mr. Gebhard intends to make it a breeding establishment second to none in the country.

The gentleman who sent the dogs to Mr. Winchell is the greatest bloodhound breede in the world, Mr. Edwin Brough. He is wealthy English gentleman, a Member o Parliament for a long term of years, and a charming writer.

The Holland, with the precious dogs or poard, could not get in at the National line pier yesterday, as the Helvetia and the Eng land were there, but she came down stream to let off the dogs and some prize horses and mules. While waiting for her Mr. Winchel

mules. While waiting for her Mr. Winchel told The Evening World reporter a greamany things about bloodhounds that were almost oppressively novel.

The idea current in most people's minds aneat the bloodhound is that he is a huge thing so savage that he would rather bit himself than have nothing to bite, fond or gore, a terrible engine of destruction which used to be turned on the trail of a poor fugitive slave, and that when he had rundown the panting black man, he let be an out of him that nearly killed the victim with fright, and then, almost beside himself with gayety, tore the poor must osmall bits. Cerberus himself was hardly worse than the popular idea of a bloodhound. Here is what Mr. Winchell said about this terrible monster:

Here is what Mr. Winchell said about this terrible monster:

"The full, thoroughbred bloodhound is one of the gentlest, most affectionate creatures in the world. They are a ladies' do, more than anything else. They are of no us as watchdogs, they are so quiet. To illustrate their sweetness of temper here is an in stance: I have a little three-year-old bo, who is awfully fond of the Duchess of Ripple."

Ripole."
The reporter looked so artlessly amazed a such precocity that Mr. Winchell hastened to add:
"She is the most femous breeding blood."

"She is the most famous breeding blood hound in the country. One day I heard the Duchess giving a bay that seemed a trifle expostulatory. This was repeated two or three times. It was unusual enough for me to go in and see what the matter was.

"There I found my little boy astride the Duchess of Ripple's back. He had a pair of scissors and was cutting at her long silk ears. He didn't mean to hurt the dog, but he had elipped her ear m two or three place so that the blood came. The Duchess simple baved a little with the pain, but wouldn't even throw the little chap off her back for fear of hurting him.

even throw the little chap off her back to fear of hurting him.

"Then, if there is any time when ba temper shows itself it is with a female do who has a litter. But you can go right int a bloodhound's pups and play with their and the most she will ever do is to push you hand away with her nose. You can't get bloodhound to bite any more than you could a sheen."

"Well, what are all these tales about blood hounds mangling the poor escaping blacks? said the reporter, indignantly. "Is the Southern bloodhound a creature of Harris Southern bloodhound a creature of Harris Beecher Stowe's imagination?"

Not entirely," said Mr. Winohell. "The bloodhounds of the South are all crosses between a thoroughbred hound and the gree Dane, a savage Russian dog. So they as fierce. There are not more than three hurdred nure strain bloodhounds in the world. By this time the Holland had brought uto the pier and Mr. Winchell and the reports scrambled onto her. Belhus and Roseman were taken out of their boxes. The dog is the best breeding bloodhound in the world. Hyms the dog that tracked after "Jack the Ripper."

He is a beautiful hound, with only on blemish, he is rather low set on his legs.
The points on a bloodhound are the lon head, long ears, and loose leather. "Leather is dog for skin. In the best specimens the ears are frequently twenty inches long, and the dewlap is very large, and the skin loosel settles about the eyes, which show the revery much. Bloodbounds are black and tan or red ar tan. Belhus has tan legs and a blanks shaped mark of black on his back. Ros mary is a French bloodhound.

Mr. Winchell took the hounds to his far in Vermont to-day. These hounds have sue a wonderful keenness of smell that they wifollow a trail even of the "clean boot" several yards distance from it.
